

Flexion Twin Lite Zoom

Discover Unmatched Clarity and Effortless Precision with Flexion Twin Lite Zoom – Powerful Twin Illumination, Smooth Zoom, and Smart Documentation in One Perfect Microscope.

The new Flexion Twin Lite Zoom combines Twin Lite illumination with the advanced Zoom Advanced optics. Its high-precision 0.5–3.0 zoom with apochromatic correction delivers razor-sharp, high-contrast images and smooth, uninterrupted workflow, reducing mental and physical strain.

Choose Blue to reveal caries and material transitions, or White for

powerful double LED illumination up to 200,000 lux. Both feature excellent light transmission, fanless 5500 K LEDs, a Natural Light Filter for extended composite working time, and a stepless iris diaphragm for precise, patient-friendly lighting. The integrated SensorUnit makes photo and video documentation effortless, displaying LED intensity and filter status.

Features CJ-Optik Flexion Twin Lite Zoom	
Zoom magnification range	0,5 - 3,0 (APO, manual zoom)
VarioFocus	VF4 (200 - 350 mm) or VF5 (210 - 500 mm), PlanAPO
Illumination	High-power LED with 5500 K, adjustable spot LED diaphragm
Filter	Natural Light Filter (extends preparation time for composites)
Documentation	SensorUnit for photo and video recordings
